📖 About character

Kromek [*krɔmek*] is a brown domestic kitty who also happens to have a knack for being a fluffy internet personality. He *may* be very shy in person and tend to avoid social interactions, but online, he feels he can truly be himself.

His almost cartoonish presence greatly complements his cartoonish personality.

Kromek's extra fluffy brown fur is loved by many of his – also furry – friends. Due to him being rather short and thin compared to them, he's an ideal companion for long cuddling sessions. He's a very needy kitten when it comes to belly rubs, head pats, and huggies ;3

On the internet, people tend to hate on or even bully him for being *different*.

Kromek, though, won't let mean people get in his head. He strives to share not only his extensive knowledge about Minecraft but also his deep bond with the furry and LGBT communities, encouraging others that being *different* is not a bad thing!
